

## Versions of Engarde

Because of a change in contexts, Engarde versions 10.045 and earlier may have problems opening competitions when version 10.1 (or later) has been installed. There is often no need to use older versions of Engarde, if you need to do it, here's how to proceed.

**If you NEVER use the context of the FFE** (Fédération Française d'Escrime), delete the file `contexte_ffe.txt` of the `Ressources1` directory.

**If you use the context of the FFE** (Fédération Française d'Escrime), you have two solutions

### 1. Temporary solution

For using a version 10.045 (or earlier), rename the `contexte_ffe.txt` file in the `Ressources1` directory to `contexte_ffe_reserve.txt`

Use version 10.045 (or earlier) of Engarde of your choice.

When finished, rename the `contexte_ffe_reserve.txt` file in the `Ressources1` directory to `contexte_ffe.txt`

### 2. Permanent solution

Install the `Engarde10.045_speciale` version in a different directory of the `Engarde10` directory of the current version of Engarde by following this link:

[https://www.engarde-escrime.com/siteTemplate.php?lang=fr&page=Installation10.045\\_speciale.htm](https://www.engarde-escrime.com/siteTemplate.php?lang=fr&page=Installation10.045_speciale.htm)

Use the application of the `Engarde10.045_speciale` directory to open the competitions with a version 10.045 of Engarde (or earlier). Search them in the `Competitions` subdirectory of the `ENGARDE10` directory (your current version of Engarde).
