

Tutorial: Display with DiapoEngarde with only one computer

This use with a single computer has the advantage of being more economical in terms of licenses and hardware. It is not suitable for large competitions or when there are many competitions at the same time.

1. Configuration in client-server mode

A computer A with an EngardePro license to manage competitions with Engarde and make images to be displayed on a screen in the room.

Cost including VAT of licenses (1 EngardePro): 72€ for 3 months; 144€ for 1 year.

A screen in the room visible from the computer or a video projector projecting onto a screen visible from the computer.

Connect the screen or projector to the computer. With the Windows settings, extend the displays (external screen 2 on the left or right or above screen 1 of the computer depending on your configuration):

Place the Engarde applications in screen 1 and the DiapoEngarde applications in screen 2. If used, place the EngardeSwitch application in screen 1.

The functioning is similar to that indicated in the document:

<http://www.engage-escrime.com/en/DiapoEngarde-client-serveur-en.pdf>

2. Configuration in file mode

A computer A with an EngardeBasic license to manage competitions with Engarde and make images to be displayed on a screen in the room.

Cost including VAT of licenses (1 EngardeBasic): 27.60€ for 3 months; 55.20€ for 1 year.

The configuration is identical to the one of the client-server mode above. DiapoEngarde opens the competitions as indicated in the document (without using the network icon):
